Subject: Air and Energy Notables 11/14 edition

Weekly Report Wednesday, November 14th 2018

Important updates from the Air and Energy national research program to keep on your radar

Hot Issues/Major Decisions

None.

Upcoming Events

Upcoming Research Area Discussions: As we move to begin implementing the draft 2019-2022 StRAP, A-E MIs will facilitate detailed discussions of our proposed Topics and Research Areas with ORD researchers. These discussions will include representatives from all relevant L/Cs and will focus on clarifying potential Outputs and related deliverables as we begin to develop Research Area plans. A plenary, overview session will be held on November 26. Specific Research Area discussions will be held on November 27 and December 4. Following these meetings, the A-E Team will engage with Partners in follow-up discussions early in CY19 to solicit their input as we further refine the Research Area plans.

Recent Highlights

Fall Air Division Directors (ADDs) Meeting Highlights: The A-E Team received a great deal of positive feedback and praise from the ADDs for improving and strengthening our connections with Regional and Program Offices at last week's semi-annual, in-person ADD meeting. In particular, Beverly Bannister, Region 4, Matt Lakin, Region 9, and Mike Koerber, OAR-OAQPS, highlighted specific examples of strong working relationships between their offices, the A-E program and associated scientists. They emphasized how A-E's communication and coordination has been more

effective over the past few years and expressed appreciation for our “nimbleness” in assisting with emerging issues in recent years (e.g., art glass, PFAS, ethylene oxide).

SGCR Meeting: Andy Miller, A-E Associate for Climate, will participate in the November 14 monthly meeting of the Subcommittee on Global Change Research. The meeting will discuss the activities of the U.S. Global Change Research Program (USGCRP) on development of the 2020 Update to the USGCRP Strategic Plan and international activities supported by the Program. The Subcommittee will also discuss approaches to identify and develop products as part of a sustained assessment effort, including special assessment reports that may be published in the intervening periods between the required quadrennial National Climate Assessments.
